IDENTIFIERS *California

ABSTRACT

This publication is concerned with the number of pupils, teachers, and schools in California and the expenditures of public funds to educate the 4.4 million children attending schools in the state. The data are presented in the form of tables. The first section concerns school district type, average daily attendance, and participation and costs of school lunch and breakfast programs. Tables concerning teachers and pupils are the subject of the second section with data on teacher distribution, salaries, enrollment figures, and class size. The third section presents information about the state-published textbooks, sources of school support, disparities in assessed valuations among districts, school elections, and tax rates. The final section presents dollar amounts for the several objects of expenditure, the amount per unit of average daily attendance, and percent of total expenditures each amount represents. (Author/MLF)

Foreword

What you hold in your hands is the most up-to-date and complete statistical picture of California education that we have available. It documents in numbers our students, the books they use, the lunches they eat, and the teachers and schools and money it takes to educate them. Over the years we have used the data in *California Public Schools Selected Statistics* to help us examine where we were and to develop a framework for where we were going.

My responsibilities as Superintendent and yours as legislator, school administrator, teacher, or concerned parent require us to orient much of our thinking to the future because we are educating children for another time. However, we who have the responsibilities for the education of a coming generation must have the data of the past to plan intelligently for that future. This publication presents many of the statistics that are so important in helping us do that important planning. It is not surprising, therefore, to learn that those involved with the *Serrano* vs. *Priest* issue also used this statistical document in presenting their cases in court, and others have turned to this publication for some of the important information they must have in carrying out the court order.

As you turn the pages of this annual statistical report, you begin to get an idea of the size, scope, and complexity of our public school system in California, and you begin to understand how difficult the issues of Serrano and school finance can be.

The concept of the *Serrano* vs. *Priest* decision, however, is not particularly difficult to understand. Basically, the court said that by 1980 a typical child in a typical school must have equal access to equal resources from an equal tax effort.

Of course, we have known for a long time that our present system of using local property taxes for the support of our schools is inequitable. This is true because some areas in California can raise a lot of money for schools using a low tax rate, while others impose a much higher tax rate that raises less money. Under our present system a child's educational opportunity is largely dependent upon wherever he or she happens to reside in the state.

If we want to concern ourselves merely with equity, the Serrano issue is not necessarily complex, but it does present some politically difficult problems to resolve. For example, one way to carry out the court order would be to level out the highs and the lows in the tax structure without regard for adequacy or quality of education; in other words take from the rich and give to the poor. However, viewing the problem from a sound educational perspective, I believe that as we resolve Serrano, we must take this opportunity to provide a quality education for every Californian. It is not acceptable to me to spread poverty equally among our schools.

It is my firm belief that providing equity, adequacy, and quality requires a comprehensive approach to the school finance issue. And to achieve a goal of quality education, we must answer three basic questions:

1. How much do we want to spend?
2. How do we want to raise the money?
3. What kind of education do we want to provide with our tax dollars?

However, a fourth question must also be answered: What will our actions do for the children?

It is time for all of us—educators, legislators, and parents—to come to agreement regarding the answers to these important questions, but most of all the parents and local citizens must answer the questions, because the schools belong to them. Yet, they cannot answer the questions very intelligently if they do not have the facts nor understand the issues. I hope this issue of *California Public Schools Selected Statistics* will provide us with some of the facts that we must have to resolve Serrano—to provide quality education for all children.

Superintendent of Public Instruction

Preface

This publication is concerned with the quantitative aspects of the public school system in California; that is, with the number of pupils, teachers, and schools and the expenditures of public funds to educate the 4.4 million children who attended California elementary schools and high schools in the 1975-76 school year. Many of the items have been reported periodically to the Department from the beginnings of the California public school system. The trends, diversities, and disparities that are evident in these statistics are prerequisites to the determination of educational policy at the state and local levels.

Historically, data on community colleges in California have been incorporated with data for elementary schools and high schools. In last year's edition of *California Public Schools Selected Statistics,* however, community college data were segregated and placed in separate tables; and this year display of the information was discontinued. The change was brought about by the development of separate and unique reporting systems at the community college level. Questions concerning data on the community colleges should be directed to the Office of the Chancellor, California Community Colleges.

Users of this publication should be aware that major changes in school accounting procedures, which were mandated by the 1973 edition of the *California School Accounting Manual,* were implemented by the school districts in the 1974-75 school year. The changes significantly revised the existing school accounting system; procedures and accounts were established for the accounting of expenditures by object rather than by function as was the previous practice. The purpose of the revision was to provide flexibility in combining accounts to illuminate many different kinds of programs. Caution should be exercised, therefore, when comparisons are made between the expenditure data reported for the years prior to 1974-75 and those reported subsequently. Income accounts were expanded in 1974-75 also, but changes do not preclude comparisons with previous years as reported in this publication.

In 1973-74 legislation became effective that altered certain trends discernible in this publication and previous editions. Senate Bill 90 (1972) and subsequent related legislation represented a major change in the traditional approach to public school finance. The laws contained general property tax rollbacks and established district revenue limits to control annual changes in district income. Mechanisms were devised to lessen the disparities of expenditures between high-wealth, low-tax school districts and low-wealth, high-tax districts, a mandate of the California Supreme Court in the *Serrano* v. *Priest* decision. The school support formula developed in Senate Bill 90 and in subsequent legislation resulted in a flow of additional state funds and property tax relief to low-wealth districts. Most high-wealth districts were granted some relief from inflation, but some were required to increase local property taxes to maintain their previous expenditure levels.

Caution should be exercised when comparing second period average daily attendance reported in this edition (Table IV-14) with that reported in prior editions of this publication. A portion of the second period average daily attendance in 1975-76 was "capped." The Budget Act of 1975 and Senate Bill 220 in

1975 placed a "cap" or limit on the attendance of district-maintained adult programs and regional occupational centers or programs and on the attendance of county-maintained regional occupational centers or programs; attendance was limited, for apportionment purposes, to 105 percent of the 1974-75 second period average daily attendance in such programs. Because the attendance in these programs constitutes a portion of the second period average daily attendance reported in Table IV-14, the totals are affected. Annual average daily attendance, used as a divisor in per-pupil income and expenditure figures throughout the publication, was not affected, however, by the "cap."

This publication is the result of the special efforts of Richard L. Zeiszler and Robert G. Oliphant, staff members of the Bureau of School Apportionments and Reports. However, without the aid of school administrators throughout the state and other units within the Department of Education, it would have been impossible to compile these data, which are so important in defining where we have been in public education, where we are, and where we hope to be.

Summary: Current Expense and State Aid Per Unit of A.D.A. and Percent of Income, by Source 117

Part I/District and School Units

Public education in California is organized administratively into the following categories: (1) the State Department of Education, which is empowered to exercise regulatory, leadership, and service functions to implement the state program of education; (2) the intermediate units; and (3) the school districts, the operation and control of which have been delegated to the people within broad limits established by the Legislature. The quality of the educational program is largely controlled at the local level by the school district governing board.

School Districts

Through the years, experience has shown that the maintenance of an effective education program requires that school districts have (1) an adequate number of pupils; (2) a tax base that includes all of the resources of the community; (3) a coordinated educational program, kindergarten through grade twelve; and (4) inclusion of an entire community within the district.

In the 1975-76 school year, approximately two-thirds of the average daily attendance in California's public elementary and secondary schools was registered in 254 unified school districts. (One new unified district was established through election and became operative on July 1, 1975.) The 792 individual elementary and high school districts served the remaining one-third of the students comprising the total state average daily attendance for kindergarten through grade twelve.

Schools

Few school districts can maintain a consistent pattern of grades in all of the elementary or secondary schools they operate because of obsolete buildings or population shifts within the districts. The predominant patterns for elementary schools are kindergarten through grade eight or through grade six. But these patterns may be modified into primary schools (kindergarten through grade three); middle schools (grades four through six); and intermediate schools (grades seven and eight) or junior high schools (grades seven through nine). Typically, secondary schools are junior high schools and senior high schools (grades ten through twelve) or high schools having grades nine through twelve. Continuation high schools provide compulsory education programs for students sixteen and seventeen years of age who are required to attend schools for three hours a day unless employed. If employed, students may attend continuation high school classes for a minimum of four hours a week.

Child Nutrition Programs

National School Lunch Program. In 1975-76 approximately 6,590 public and private schools participated in the National School Lunch Program and served 1.5 million lunches daily. Almost 58 percent of the meals were served free or at a reduced price.

Special Milk Program. The Special Milk Program provides midmorning or midafternoon nourishment for kindergarten pupils and for pupils who bring lunches from home. In 1975-76 the milk provided amounted to more than 160 million half-pint equivalents in addition to the 314 million half-pint equivalents provided through the school lunch program.

School Breakfast Program. In 1975-76 the rapidly growing School Breakfast Program involved 1,707 schools that served over 261,000 breakfasts daily to children in low-income areas. Free breakfasts were provided for those unable to pay even a nominal amount.

Federal support for child nutrition programs was very evident in 1975-76. The U.S. Department of Agriculture distributed to schools foods with a fair market value of $23.9 million and charged $2.4 million for such food. Federal cash reimbursements were increased from approximately $108 million in 1974-75 to more than $170 million in 1975-76.

1973-74	84,237,649	127,515,140	211,752,789
1974-75	108,007,736	182,150,536	290,158,272
1975-76	170,413,184	203,853,388[a]	374,266,572

NOTE: Includes nonpublic schools.

[a]Distribution of state and local support, 1975-76:

1. State expenditures for administration (direct costs)	$580,678
2. Support from general funds of school districts	45,649,614
3. Income from breakfast and lunch sales to children	53,434,840
4. Income from sales of a la carte food and milk and from miscellaneous foods (in previous years reported as "income from lunch sales to children")	59,772,537
5. Income from sales to adults (in previous years reported as "other income")	11,700,525
6. "Other" income	10,764,741
7. Senate Bill 120 funds [Ch. 1277 (1975)] –state meal reimbursement (previously reported as "SB 2020 funds")	16,856,280
Senate Bill 120 funds–subsidy, meals for needy	5,088,173
Total	$203,853,388

Part II/Teachers and Pupils

Teachers

In the fall of 1975, approximately 187,670 full-time teachers were employed in the California public elementary schools and high schools. The number of reported teachers increased 220 from the number reported in the fall of 1974. One-fourth of the elementary teachers and high school teachers were paid less than $13,070, and one-fourth were paid more than $17,891. The median salary of elementary teachers was $15,065, and the median salary of high school teachers was $16,440.

Full-Time-Equivalent Employees

In the fall of 1975, California school districts employed approximately 14,400 full-time-equivalent administrators, 13,400 full-time-equivalent pupil personnel services employees, 203,300 full-time-equivalent teachers, and 132,600 full-time-equivalent classified employees. These numbers translate into ratios of 7.0 administrative employees, 6.6 pupil services employees, and 65.2 classified employees per 100 teachers. (Full-time-equivalents include full-time, part-time, and prorated portions of employee time.)

Pupils—Public Schools

The total enrollment in public elementary schools and high schools in the fall of 1975 increased 71,638 from the fall of 1974; however, an enrollment increase of more than 79,500 in classes for adults masked the major decrease occurring in other enrollments. Enrollments in the elementary grades declined 0.9 percent, and enrollments in the high school grades increased 1.2 percent. A decline of 10.8 percent occurred in enrollments in special classes for the educable mentally retarded. This decline can be explained at least in part by the use of new procedures in establishing pupil eligibility for enrollment in such classes.

Pupils—Private Schools

Enrollments in private elementary and high schools in California increased 9,303 from spring, 1974. In the spring of 1975, a total of 421,647 pupils were enrolled in 2,668 nonpublic schools. Of this number, 331,011 (79 percent) were enrolled in church-affiliated private schools.

Class Size; Pupil-Teacher Ratios

In 1975-76 the average class size in grades one through three increased from the 1974-75 average of 27.2 to 27.5; the pupil-teacher ratio in grades four through eight decreased from 27.1 to 27.0. This pupil-teacher ratio is the lowest reported during the past seven years.

Days of Instruction

A minimum of 175 days of instruction must be offered by school districts in California unless some unusual circumstance intervenes. In 1975-76 one district offered 180 or more days of instruction, and over half of the districts operated at the minimum of 175 days.

Summer Schools

In 1975-76 more than 841,800 elementary school pupils attended summer school at least 200 minutes a day, five days a week, for four consecutive weeks. This attendance represented 32 percent of the state's fall enrollment in kindergarten through grade eight. Students representing about 37 percent of the state fall enrollment in grades nine through twelve attended summer school at least 240 minutes a day, five days a week, for six consecutive weeks. Typically, high school students enrolled in two subjects of their choice for the summer session.

Table II-1

Distribution of Full-Time Teachers in California Public Schools, by Salary Paid, 1975-76

Yearly salary	Number of teachers, by level[a]		
	Elementary[b]	High school[c]	Total
Under $9,600	2,733	899	3,632
$9,600 to 9,899	1,164	472	1,636
9,900 to 10,199	1,373	597	1,970
10,200 to 10,499	1,836	908	2,744
10,500 to 10,799	2,034	912	2,946
10,800 to 11,099	2,487	1,737	4,224
11,100 to 11,399	2,446	1,081	3,527
11,400 to 11,699	2,928	1,836	4,764
11,700 to 11,999	2,823	1,274	4,097
12,000 to 12,299	3,043	1,763	4,806
12,300 to 12,599	3,108	1,389	4,497
12,600 to 12,899	3,291	1,909	5,200
12,900 to 13,199	3,569	1,493	5,062
13,200 to 13,499	3,425	1,907	5,332
13,500 to 13,799	3,886	1,774	5,660
13,800 to 14,099	3,457	1,986	5,443
14,100 to 14,399	3,714	1,683	5,397
14,400 to 14,699	4,171	2,056	6,227
14,700 to 14,999	3,754	1,733	5,487
15,000 to 15,299	3,761	2,198	5,959
15,300 to 15,599	3,638	1,868	5,506
$15,600 to 15,899	4,514	2,454	6,968
15,900 to 16,199	3,538	1,923	5,461
16,200 to 16,499	3,621	2,390	6,011
16,500 to 16,799	3,564	2,147	5,711
16,800 to 17,099	3,920	2,918	6,838
17,100 to 17,399	3,634	1,880	5,514
17,400 to 17,699	3,367	2,965	6,332
17,700 to 17,999	3,520	2,429	5,949
18,000 to 18,299	3,220	2,569	5,789
18,300 to 18,599	2,113	2,270	4,383
18,600 and over	14,470	20,127	34,597
Totals	112,122	75,547	187,669
First quartile	$12,787	$13,620	$13,070
Median	15,065	16,440	15,584
Third quartile	17,289	18,618	17,891
Mean	$14,927	$15,817	$15,285

[a] Teachers employed on two levels have been classified at the level to which the major portion of their time is assigned.

[b] Includes kindergarten teachers.

[c] Includes junior high school teachers.

Table II-2

Number of Full-Time-Equivalent Employees in California School Districts as of November, 1975

Classification of districts	Number of districts	Units of average daily attendance (1974-75 fiscal year)	Number of full-time-equivalent employees					
			Certificated employees				Classified employees	Total
			Administrative	Pupil services	Teachers	Subtotal		
Unified	254	3,123,454	9,707.8	9,107.8	136,418.7	155,234.3	88,465.2	243,699.5

High school (301 a.d.a. and over)	85	468,480	1,217.4	2,073.9	20,338.7	23,630.0	12,315.3	35,945.3
Common administration	42	169,071	452.0	560.0	7,387.7	8,399.7	4,829.3	13,229.0
Subtotal, districts reporting	882	4,663,032	14,266.7	13,424.8	202,997.8	230,689.3	132,432.8	363,122.1
Estimates for districts not required to report:								
Elementary (under 101 a.d.a.)	155	7,393	155.0	0.0	310.0	465.0	165.0	630.0
High school (under 301 a.d.a.)	9	1,678	9.0	4.5	18.0	31.5	27.0	58.5
Subtotal	164	9,071	164.0	4.5	328.0	496.5	192.0	688.5
Total	1,046	4,672,103	14,430.7	13,429.3	203,325.8	231,185.8	132,624.8	363,810.6

Table II-3

Ratio of Full-Time-Equivalent Personnel to Full-Time-Equivalent Classroom Teachers in California Public Schools as of November, 1975

Classification of districts	Number of districts	Units of average daily attendance (1974-75 fiscal year)	Ratios (per 100 teachers)		
			Administrative	Pupil services	Classified
Unified	254	3,123,454	7.1	6.7	64.8
Elementary	501	902,027	7.4	4.3	69.0
High school	85	468,480	6.0	10.2	60.6
Common administration	42[a]	169,071	6.1	7.6	65.4
Total	882	4,663,032	7.0	6.6	65.2

[a]Twenty-one ratios were reported for common administration districts; each ratio was obtained from combined data of an elementary and a high school district.

Table II-4

Median Salaries and Number of California Full-Time Teachers, by County and by Level, 1975-76

County	Elementary		High school		Total	
	Number of teachers	Median salary	Number of teachers	Median salary	Number of teachers	Median salary

Table II-5

Comparison of California Public School Enrollments, Fall, 1974, and Fall, 1975

Grade or class	Fall 1974	Fall 1975	Increase or decrease between fall, 1974, and fall, 1975	
			Number	Percent
Graded enrollment				
Kindergarten	318,421	328,239	9,818	3.1
Grade one	311,933	325,352	13,419	4.3
Grade two	303,393	303,934	541	0.2
Grade three	305,526	301,382	−4,144	−1.4
Grade four	321,199	305,654	−15,545	−4.8
Grade five	339,799	322,160	−17,639	−5.2
Grade six	344,754	341,254	−3,500	−1.0
Grade seven	356,357	349,336	−7,021	−2.0
Grade eight	358,518	356,259	−2,659	−0.7
Enrollment, kindergarten through grade eight	2,960,300	2,933,570	−26,730	−0.9
Grade nine	364,701	368,831	4,130	1.1
Grade ten	353,856	362,118	8,262	2.3
Grade eleven	327,264	331,633	4,369	1.3
Grade twelve	289,293	288,319	−974	−0.3
Enrollment, grades nine through twelve	1,335,114	1,350,901	15,787	1.2
Enrollment, kindergarten through grade twelve	4,295,414	4,284,471	−10,943	−0.3
Adults and special classes				
Special pupils in elementary schools	279	459	180	64.5
Students in compulsory continuation classes	34,247	37,217	2,970	8.7
Special classes for physically handicapped minors:				
Elementary schools	13,891	15,335	1,444	10.4
Grades seven and eight in junior high schools	1,471	1,243	−228	−15.5
High school level	5,468	6,009	541	9.9
Enrollment, special classes for physically handicapped minors	20,830	22,587	1,757	8.4
Special classes for educable mentally retarded minors:				
Elementary schools	13,144	11,610	−1,534	−11.7
Grades seven and eight in junior high schools	4,276	3,568	−708	−16.6
High school level	9,155	8,515	−640	−7.0
Enrollment, special classes for educable mentally retarded minors	26,575	23,693	−2,882	−10.8
Special classes for trainable mentally retarded minors:				
Elementary schools	7,702	7,646	−56	−0.7
Grades seven and eight in junior high schools	213	319	106	49.8
High school level	3,850	3,974	124	3.2
Enrollment, special classes for trainable mentally retarded minors	11,765	11,939	174	1.5
Special classes for educationally handicapped minors:				
Elementary schools	24,125	24,281	156	0.6
Grades seven and eight in junior high schools	2,535	2,587	52	2.1
High school level	4,402	4,807	405	9.2
Enrollment, special classes for educationally handicapped minors	31,062	31,675	613	2.0
Special students—high school level	7,271	7,530	259	3.6
Classes for adults	579,770	659,280	79,510	13.7
Total, all grades and classes	5,007,213	5,078,851	71,638	1.4

Table II-6

Summary of Annual Enrollments in California Private Schools, 1973 Through 1975

Grade or class	All schools			Church-affiliated schools			New schools		Schools closed prior year[a]
	1975	1974	1973	1975	1974	1973	1975	1974	
Kindergarten	31,624	27,263	25,085	15,545	13,593	12,728	2,371	1,743	1,209
Elementary:									
Grade one	38,487	35,550	35,069	29,537	28,038	27,974	873	662	691
Grade two	34,618	33,522	33,586	27,957	27,690	28,210	523	422	502
Grade three	33,529	33,015	34,512	28,019	28,098	29,657	407	450	517
Grade four	33,058	34,074	36,027	28,232	29,507	31,465	413	422	623
Grade five	34,104	35,535	35,445	29,419	30,965	31,212	453	423	665
Grade six	35,579	35,008	35,794	30,822	30,751	31,758	497	435	609
Grade seven	36,047	36,165	36,240	30,996	31,667	32,092	383	422	519
Grade eight	34,545	34,476	34,117	29,735	30,302	30,281	341	399	487
Ungraded	11,234	10,583	10,795	1,652	1,390	1,689	936	675	1,123

Part III/ Textbooks, Public School Revenues, Assessed Valuation, Revenue Limit and Bond Elections, and Tax Rates

Textbooks

California is the only state in the United States that prints its own textbooks and provides them without cost to school districts operating kindergarten or grades one through eight. High school textbooks are purchased locally. The State Board of Education determines which elementary textbooks will be used and makes the required adoptions. However, in determining which textbooks it will adopt, the Board gives full consideration to the recommendations made by the Curriculum Development and Supplemental Materials Commission. Established by law in 1927, the commission is composed of outstanding educators appointed primarily by the State Board of Education but also by the Legislature and the Governor.

Originally, the state provided a single textbook in each subject for each grade; later, supplementary textbooks were added. Most recently, a variety of both basic and supplementary textbooks has been provided to accommodate pupils of varying abilities and social backgrounds. Special materials also have been provided to help teachers utilize the textbooks effectively.

Recent legislation authorizes the issue of instructional materials consisting of such items as films, tapes, flash cards, kits, phonograph records, graphs, charts, and multimedia systems in addition to the textbooks authorized by previous legislation. School districts were permitted to order such items for use in the 1974-75 school year and in following years. Tables III-1A through III-1C present data on textbooks.

Revenues

The three sources of revenue for public school support are characterized as "local," "state," and "federal." Property taxes provide most local revenues. State revenues are apportioned to school districts for general use and for categorical or specified use. In addition, state revenues are committed to teacher retirement benefits, liquidation of state school building aid bonds, and the purchase of elementary school textbooks. Federal revenues are largely directed to categorical use in support of specific programs (Table III-3) and may be transmitted directly to school districts or indirectly through the State Department of Education or through offices of county superintendents of schools.

Assessed Valuation

The ability of a school district to provide local revenues can be measured by the amount of assessed valuation that exists for each unit of average daily attendance. California is moving toward uniform assessment among the 58 counties. So that more uniform assessments for public school purposes can be achieved, the assessed valuation in individual counties is modified by the "Collier factor," which takes into account the relationship of the county assessment level to the statewide average assessment level.

Some state revenues are apportioned to all school districts as "basic aid," and additional state revenues are apportioned to some districts as "equalization aid" to compensate for low assessed valuation per unit of average daily attendance. Table III-6 presents data on assessed valuation per unit of a.d.a. for the elementary school and the high school levels; these data are used for apportionment purposes. Tables III-7, III-8, and III-9 present the assessed valuation per unit of a.d.a. for unified, elementary, and high school districts to illustrate the disparities in assessed valuations among districts as highlighted in the *Serrano* case.

Revenue Limit Elections

A major feature of Senate Bill 90 (1972), which establishes a new school finance program for California public schools, is the imposition of annually computed revenue limits on the school districts. Thus, the general-purpose tax rate intended to produce the local portion of revenues supporting schools is controlled.

School district governing boards must receive voter approval to increase the computed revenue limit. The ballot proposition presented to the voters for their approval must include the estimated increase in the general-purpose tax that would be caused by the proposed increase in the revenue limit. In 1975-76 a total of 123 elections were held in which voters were asked to approve increased revenue limits. A total of 31 (25.2 percent) were successful.

Bond and State Loan Elections

California is one of very few states that require more than a simple majority vote to incur long-term indebtedness. In a statewide referendum, however, California voters approved the use of a simple majority to approve state bonds and loans for the specific purpose of replacement or rehabilitation of school buildings that fail to meet earthquake safety standards. This special authorization expired in 1975.

Table III-1 A

Number of Textbooks in State Adoption for Kindergarten Through Grade Eight in California Public Schools, by Selected Years

Year	Number of textbooks	Year	Number of textbooks
1940-41	59	1965-66	437
1945-46	85	1970-71	753
1950-51	137	1971-72	801
1955-56	195	1972-73	803
1960-61	305	1973-74	845

Table III-1 B

Number of Instructional Materials in State Adoption for Kindergarten Through Grade Eight in California Public Schools

Year	Number of textbooks	Number of audio-visual materials	Total number of titles
1974-75	1,011	246	1,257
1975-76	3,822	1,939	5,761
1976-77	4,090	4,010	8,100
1977-78	4,499	4,321	8,820

The impact of the two-thirds requirement for regular bond elections is dramatically illustrated by the outcome of the 58 elections held in California school districts in 1975-76. Of the 58 issues voted upon, 27.6 percent were successful; under a simple majority requirement, 83 percent would have been successful. Two bond elections were held to replace unsafe school buildings; both were approved by the authorized simple majority vote.

Tax Rates

Senate Bill 90 eliminated a large number of the permissive tax rates available to school district governing boards to finance specific programs. Those levies associated with various recoupments, with employee benefits, or with special pupils were absorbed within the general purpose tax, and those levies associated with capital outlay or debt service were allowed to remain as permissive overrides. A given parcel of property may be subject to an assortment of elementary school, high school, and community college district taxes. Table III-19 presents various tax rates for individual school districts.

Table III-1 C

State General Fund Expenditures for Elementary Textbooks in California

Year	General Fund expenditures	Year	General Fund expenditures
1956-57	$6,099,755	1966-67	$17,525,648
1957-58	5,325,860	1967-68	21,260,092

NOTE: Data include support for community college districts for 1955-56 through 1973-74, but not for 1974-75.

[a] State revenues (Governor's Budget and Controller's Report) include apportionments to school districts, debt service on school construction bonds, teacher retirement, textbooks, and vocational education.

[b] Local revenues (Controller's Report) include General Fund taxes, bond interest and redemption taxes, community college tuition, high school tuition, and taxes levied for offices of county superintendents of schools.

NOTES: Elections prior to 1973-74 were tax rate elections rather than revenue limit elections. Some tax elections were in sections, with tax increase proposals in each. This table was prepared on the basis of the first tax rate scheduled to be in effect.

Elections for community college districts were omitted from this table.

NOTES: ***Total tax rate*** is the sum of rates levied against the assessed valuation of the district to provide local revenue to support the current operations of the district, to meet long-term debt obligations, and to finance certain programs or services initiated at the discretion of the district governing board.

General Purpose tax rate is the rate levied in conjunction with the district revenue limit plus the areawide tax levied, where appropriate. (In 1975-76 nine high school, ten unified, and 620 elementary districts were subject to areawide taxes.) Currently, the General Purpose tax rate of a school district is determined annually to provide local revenues sufficient to complement state apportionments in meeting the district revenue limit amount. However, the district governing board may choose to operate with a revenue limit lower than the authorized revenue limit and consequently will levy a General Purpose tax that is lower than that authorized.

Capital Outlay and/or Debt Service tax rate is the sum of district tax rates levied to liquidate long-term debt that includes the principle and interest of outstanding bonds and/or the principle and interest on state construction loans. Rates associated with the leasing of facilities and with earthquake safety correction measures also are included. All rates except those associated with earthquake safety correction measures and the Regional Occupational Centers or Programs result from voter approval. The latter rates are levied at the discretion of the local governing board within statutory maximum rates.

Children's Center Fund	8329							
Unified districts		–	24	9	3	5	41	16.1
Elementary districts		–	12	4	1	2	19	2.8
High school districts		–	3	–	–	–	3	2.6
Development Centers Fund	56811							
Unified districts		–	15	1	1	–	17	6.7
Elementary districts		–	11	2	–	–	13	1.9
High school districts		–	–	–	–	–	–	–

NOTE: Local governing boards may choose to make school buildings and playgrounds available for civic and recreational purposes or choose to provide breakfast and lunch free or at a reduced price for needy pupils. In either instance the attendant costs can be covered by revenues derived from a permissive override tax with statutory maximum rates. Local governing boards may choose to operate Children's Centers or Development Centers for Handicapped Minors with the approval of the Superintendent of Public Instruction, and they may levy permissive override taxes for revenues to augment state aid and federal funds available to such programs.

[i] Tax rates are shown under the respective county of control. [j] This is a joint district located in two or more counties; tax rates shown are for the portion of the district within the specified county.
[k] This elementary district is included in two high school districts; tax rates shown are for the portion of the district within the specified high school district.

Part IV/ Public School General Fund Expenditures

School district budgeting and accounting systems include a variety of funds, but the General Fund is common to all operating school districts. Additional funds maintained by some school districts include the Bond Interest and Redemption Fund, the Building Fund, the Special Reserve Fund, the State School Building Aid Fund, the Cafeteria Fund or Account, the Child Development Fund, and the Development Center for Handicapped Pupils Fund. *The California School Accounting Manual* provides for the uniform identification and classification of all expenditures of school districts and is consistent for the several funds.

This publication presents General Fund expenditures only. The State Controller's publication, *Annual Report: Financial Transactions Concerning School Districts of California,* includes income and expenditure data for all funds.

The 1973 edition of the *California School Accounting Manual,* implemented in the 1974-75 school year, incorporated extensive revisions in the school accounting system. The previous practice for accounting of expenditures by function was overhauled in favor of accounting by object. This approach allows greater flexibility because object accounts may be combined in any number of ways to illuminate many different kinds of programs.

The accounting manual provides for seven major General Fund object of expenditure classifications: (1) 1000–**Certificated Salaries**; (2) 2000–**Classified Salaries**; (3) 3000–**Employee Benefits**; (4) 4000–**Books, Supplies, and Equipment Replacement**; (5) 5000–**Contracted Services and Other Operating Expenses**; (6) 6000–**Capital Outlay**; and (7) 7000–**Other Outgo**. Each of these major classes has several subordinate classes.

The Total Current Expense of Education as amended by the 1973 manual is the sum of major object of expenditure classifications 1000 through 5000, excluding expenditures in each of the classifications for community services, food services, and facilities acquisition and construction. Food Services, Community Services, and Capital Outlay are not considered part of Total Current Expense of Education because of the variation of expenditure in these classes among school districts; however, such expenditures are added to the Total Current Expense to yield a Total Expenditure amount.

The tables in Part IV present dollar amounts for the several objects of expenditure, the amount per unit of average daily attendance, and the percent of total expenditures each amount represents. Table IV-14 presents similar and related data for individual school districts. Tables IV-8 through IV-12 illustrate the manner in which the new objects of expenditure may be combined to yield expenditures by program.

Table IV-1 A

General Fund Expenditures in All California School Districts

(Total current expense of education and total expenditures per unit of a.d.a.)

Fiscal year	Unified school districts		Elementary school districts		High school districts		Community college districts		Total, all districts[a]

Other Publications Available from the Department of Education

California Public Schools Selected Statistics is one of approximately 400 publications which are available from the California State Department of Education.

The following 11 curriculum frameworks are available:

Art Education Framework (1971)	$0.65
Drama/Theatre Framework for California Public Schools (1974)	1.05
English Language Framework for California Public Schools (1976)	1.50
Foreign Language Framework for California Public Schools (1972)	.65
Framework for Health Instruction in California Public Schools (1972)	.65
Mathematics Framework for California Public Schools (1975)	1.25
Music Framework for California Public Schools (1971)	.65
Physical Education Framework for California Public Schools (1973)	.65
Framework in Reading for the Elementary and Secondary Schools of California (1973)	1.25
Science Framework for California Public Schools (1970)	.65
Social Sciences Education Framework for California Public Schools (1975)	1.10

Other publications which are frequently used by educators in California are the following:

California Private School Directory (1977)	5.00
California Public School Directory (1977)	11.00
Administration of the School District Budget (1975)	1.75
Administration of the School District Risk Management Program (1977)	2.50
Advanced Placement Program in California (1977)	1.40
Apprenticeship Handbook for Educators (1974)	$3.50
California Guide to Traffic Safety Education (1976)	3.50
California Master Plan for Special Education (1974)	1.00
California School Accounting Manual (1976)	1.65
California State Plan for Vocational Education (1976)	.65
Courses Offered by California Schools (1976)	2.25
Early Childhood Education in Action (1975)	1.00
Early Childhood Education: Report of the Task Force (1972)	.95
Evaluation Report of ECE, ESEA Title I, and EDY, 1975-76 (1977)	1.75
A Guide for Ongoing Planning (1977)	1.10
Inservice Guide for Teaching Measurement: An Introduction to the SI Metric System (1975)	1.25
Manual of First Aid Practices for School Bus Drivers (1972)	.90
A Plan for Improving Mathematics Instruction in California Elementary Schools: Final Report of the Mathematics Education Task Force (1976)	1.25
Regulations and Laws Relating to Pupil Transportation (1975)	.90
The RISE Report: Report of the California Commission for Reform of Intermediate and Secondary Education (1975)	.85
Year-Round Education Handbook (1975)	1.50

Orders should be directed to:

California State Department of Education
P.O. Box 271
Sacramento, CA 95802

Remittance or purchase order must accompany order. Purchase orders without checks are accepted only from government agencies in California. Six percent sales tax should be added to all orders from California purchasers.

A complete list of publications available from the Department may be obtained by writing to the address listed above.
